AGS GENE SHIELD™ & GENETIC TESTING PRIVACY

Your DNA is your most valuable personal possession. Protect it with AGS GeneShield™.

YOUR PRIVACY . OUR PRIORITY

At AGS, we take privacy very seriously and adhere to strict confidentiality and data security policies that ensure your genetic information is kept safe and private. Unlike other genetic testing companies, AGS does not sell, share, or disclose any personal data to any third parties and will not use your genetic data for research or other purposes.

Confidentiality is a critical part of the AGS code of ethics. Traditional genetic testing companies and related businesses are self-regulated and sell genetic data at will. This allows them to market and sell genetic testing kits at a significant savings to you because they make more money selling your genetic data to multiple third parties. With other genetic testing companies, you become their product.

Not with AGS. Period. No exceptions.
HEALTH & WELLNESS
GENETIC TESTING

Take control of your health and wellness with a personal AGS Genetic Test.

Premium & NutraFit Genetic Tests
Drug Sensitivity/PGx Genetic Tests
SkinHealth Genetic Test

YOUR PRIVACY OUR PRIORITY

At AGS, we take privacy very seriously and adhere to strict confidentiality and data security policies that ensure your genetic information is kept safe and private. Unlike other genetic testing companies, AGS does not sell, share, or disclose any personal data to any third parties and will not use your genetic data for research or other purposes.

Confidentiality is a critical part of the AGS code of ethics. Traditional genetic testing companies and related businesses are self-regulated and can sell genetic data at will. This allows them to market and sell genetic testing kits at a significant savings to you because they make more money selling your genetic data to multiple third parties. With other genetic testing companies, you become their product. Not with AGS.

Drug Sensitivity/PGx Genetic Tests
Understand how your unique genes affect your reaction to drugs and a variety of prescribed and recreational medications. Work with your physician, pharmacist, and other clinical care providers to eliminate the guesswork and avoid Adverse Drug Reactions.

Avoid Dangerous ADRs . Decrease Health and Pharmaceutical Costs
Improve Treatment Compliance . Reduce Drug Abuse & Misuse
Cut Trial and Error Period of New Medications & more!

SkinHealth Genetic Test
Achieve and maintain optimal skin health that will last a lifetime. Delay the process of aging and maintain healthier skin through an analysis of unique genes. Receive personal recommendations for treatment options and skin care options.

Diminish Wrinkles . Enhance Skin Repair . Maintain Hydration Levels
Reduce Inflammation & Irritation . Select Optimal Cosmetics
Decrease Glycation . Adjust Diet, Supplements & more!

GENETIC TESTING:
The New Frontier of Health & Wellness
What information do I need to know about Advanced Genomic Solutions (AGS)?
Advanced Genomic Solutions (AGS) empowers clients to make smarter lifestyle choices based on their unique genes. We simplify and summarize complicated genetic data into an easy-to-read format and offer optional post-testing consultations. Unlike several other genetic testing companies, AGS does not sell or transfer our client’s data. AGS owns and operates its own CLIA/CAP labs and does not outsource reporting to third party software companies. We are a one-stop-shop for safe, effective, accurate testing.

How accurate and reliable are the results? What is the science behind the test?
Our reports have been validated to be 99.9% accurate. To veracity, AGS runs an individual’s specimen twice to compare results. All DNA is constructed of four bases: Adenine (A), Guanine (G), Cytosine (C), and Thymine (T). The sequencing of these base pairs make up a person’s unique genetic information. In 2003 the Human Genome Project was able to sequence and map the entire human genome. This blueprint created the foundation for AGS to determine those genes related to optimal health, wellness, and performance. All included genes are highly studied and validated with clinical relevance by our scientific review board.

Will my test report on ancestry or illness and disease markers?
No. AGS does not test for ancestry, paternity, forensics, or illness and disease markers. We only deliver crucial information about yourself that can help you make changes to live a healthier lifestyle and achieve optimal health and wellness goals.

Why is genetic testing privacy so important and how does AGS ensure data security?
Some laws (such as GINA and HIPAA) limit how personal genetic information can be used, but none truly ensures personal privacy. And, that may not even be possible, because genetic information is unique to every individual. It cannot be “de-identified.” Even if separated from obvious identifiers like name and Social Security number, it is still forever linked to only one person in the world.

How do I submit my DNA & how do I receive my results?
Once your order has been received, AGS will send a Genetic Test Collection Kit. Sample collection is simple & painless. Simply rub the inside of your cheek for 30 seconds with the enclose, let the sample dry, and return to AGS in the postage-paid envelope. Once your sample has been tested and verified, your report will be sent via encrypted email in approximately 2 to 3 weeks.

Who can review my report with me & help me implement my results?
There are a number of resources available to help you better understand your AGS Genetic Profile report, including a robust Client Guide and Implementation Manual for the Premium and NutraFit reports. In addition, AGS encourages you to share a copy of your report with all health, fitness, nutrition, or clinical care professionals participating in your wellness journey. Each will have the knowledge, experience, and expertise to guide you through the process of implementation and to help set realistic goals. We also offer free online report overview sessions and have a vast network of authorized providers and Genetic Health Specialists who can be hired for personal coaching, training, and or consultation.

PROVEN RESULTS
We vetted many different groups & AGS exceeded our requirements for partnership: reputation, evidence, and privacy. Having a health and wellness genetic test can take standard one-size fits all campaigns and help them evolve into individual solutions that drive engagement.”

~ Chuck Gillespie, CEO | NWI

Feedback from satisfied clients:
“Great information! ”I now understand how to use this report to reach my goals.” “I had no idea I have been doing things wrong this whole time.” ”Very informative - I did not realize my genes could have such an impact on my health.” “I now know how to approach working out to prevent injury.” “This helps me be more motivated to get back on track.” “This has prompted me to have an in depth conversation with my doctor.” “I had no idea I may not be absorbing vitamins/minerals well.” ”The connection between my habits and my diet was eye opening.” “I can’t wait to share this with others!”

SUCCESS STORIES & TESTIMONIALS

Be empowered to make smarter lifestyle choices with an AGS Genetic Test.

AGS is awesome! As a part of our Corporate Health and Wellness program, we had the amazing opportunity of partnering with AGS to provide an invaluable tool to take our membership’s health and wellness to the next level.

With a rate of over 50% participation, I feel it is safe to say that our organization has embraced the future and is committed to stepping outside the box of normal health and wellness initiatives to better improve the well being of each other as well as the lives that we serve. From our boots on the ground members, here are comments that we have received:

- "Great information! I am so glad the District is providing this benefit."
- "I now understand how I can use this report to reach my goals."
- "I had no idea I have been doing things wrong this whole time."
- "I did not realize my genes could have such an impact on my health."
- "I now know how to approach working out to prevent injury."
- "This helps me be more motivated to get back on track."
- "I learned new things to try!"
- "I had no idea I may not be absorbing vitamins and minerals well."
- "The connection between my habits and my diet was eye opening."
- "Participating in this program and receiving my results have prompted me to have more in depth conversations with my doctor."

Without the partnership we have grown with AGS, I am not sure that we would have seen the success of our program. From the reassurance of data security, the flexibility of meeting our unique needs, and the willingness to assist with educating our members, AGS has been, and will continue to be, our number one Health and Wellness Genetic Testing partner.

Laura Abeloe, Benefit Manager
Mesa County Valley School District #51 (CO)
GETTING STARTED

We are excited to bring a partner like AGS to the NWI network to help people better understand their genetic makeup. As wellness is maturing, there is a need to tailor wellness and health plans to the individual. Genetic testing is the best way to understand the dynamic of how your body chemistry adapts to lifestyle changes.

As we vetted many different groups, AGS exceeded NWI’s requirements for partnership: privacy, reputation, and sound evidence. Having a genetic test being part of your wellness initiative can take one-size-fits-all promotion campaigns and evolve them into individual solutions.

Chuck Gillespie, CEO & Executive Director
National Wellness Institute

AGS Practitioner & Provider Program

Of the many genetic testing companies I have used in my professional practice, I have found AGS to have the most accurate reporting available. Their iron wall of privacy is of utmost importance to the many sports professionals and athletic organizations I work with, including owners, doctors, and players alike. AGS is the only genetic testing company I currently trust without question.

Dr. Robert Pastore, PhD CNS
Nutrition Expert to Professional Athletes & Major League Organizations

I am so happy I made the decision to partner with AGS for both quality and service. They took the time to ensure I obtained accreditation to further educate my Athletes on their services and are continually striving to improve their provider education courses, quality of testing, and information shared online. I respect and appreciate their personal approach to servicing both their providers and customers.

Courtney Ustrzycki
Nutrition, Strength & Fitness Confidence Coach | Canadian Protein Sponsored Athlete

AGS Health & Wellness Genetic Profile Report

I want to let you know how impressed I am with the quality and specific feedback I recently received from my AGS Health & Wellness Profile. Thank you so much for providing such a wonderful product to help people like me better understand how our genetics factor into our overall health and well-being. As a result of my personal experience with the AGS Health & Wellness Genetic Profile and the concise interpretation I received from my AGS consulting session, I recommend this report for anyone interested in improving their health and well-being. The profile results are making a big difference in my daily dietary decisions and I believe they will lead to optimal health outcomes for me. Thank you, again, for providing such a wonderful product and service!

Jeff Rubleski, Director of Sales Strategy
Blue Cross/Blue Shield, Michigan

Innovative organizations across the nation and around the world are choosing Advanced Genomic Solutions (AGS) as their exclusive partner for simple, secure, private genetic testing to advance their workplace wellness initiatives.

**CORPORATE WELLNESS GENETIC PROGRAM**

An innovative approach to the personalization of workplace wellness.

Improve Engagement & Compliance . Enhance Health . Increase ROI . Reduce Costs

---

**GENETIC TESTING:**
The New Frontier of Health & Wellness

Innovative organizations across the nation and around the world are choosing Advanced Genomic Solutions (AGS) as their exclusive partner for simple, secure, private genetic testing to advance their workplace wellness initiatives.

AGS Corporate Wellness Genetic Programs are uniquely designed to enhance traditional health screening and behavior modification programs by providing employees with detailed knowledge of their personal DNA to set and achieve a variety of health, wellness, fitness, nutrition, and lifestyle goals.

To ensure successful uptake and implementation, each program is customized to meet the specific goals and outcome objectives of the company, organization, broker, third-party wellness provider, and/or the individual employee populations we serve.

**Traditional Integration Options Include:**
- Corporate Wellness Programs & Health Initiatives
- Voluntary Benefits & Open Enrollment
- Health Optimization Platforms
- Customized Offerings
Implementing a customized AGS Corporate Wellness Genetic Program increases engagement & compliance in employer-sponsored wellness initiatives and allows employers to go beyond basic biometric screenings to personalize programs that will meet the growing demands and unique needs of its individual team members.

**Featured Benefits for Employees:**
- Applicable to all areas of life.
- One-time testing: genes do not change.
- Simple on-site or at-home cheek swab for DNA collection.
- Highly-actionable and easy-to-understand genetic test reports.
- Genetic test results released only to employee within 2-3 weeks.
- Learn how one's body responds to diet, supplements, exercise & more.

**Proven Benefits to Employers:**
- Decrease absenteeism, sick time, and lack of productivity.
- Increase wellness program engagement and compliance.
- One-time investment; unlimited benefits.
- Training and integration support.
- Potential for year one ROI.

**PROVEN RESULTS**

Upon the integration of AGS Genetic Testing into our Corporate Wellness program, we experienced a spike in participation & took membership health to the next level. From feedback received, our team is excited to embrace the future. We are committed to stepping outside the box of normal wellness initiatives to better improve the well-being of each other, as well as the lives that we serve.

Without our partnership with AGS, I am not sure we would have seen the success of our program. From the assurance of data security, the flexibility of meeting our unique needs, and the willingness to assist with educating our members, AGS has been and will remain our number one Health and Wellness Genetic Testing partner.

Laura Abeloe, Benefit Manager
Mesa County Valley School District 51 (CO)

We vetted many different groups & AGS exceeded our requirements for partnership: reputation, sound evidence, and privacy. Having a genetic test being part of your wellness initiative can take one-size fits all promotion campaigns and help them evolve into individual solutions that drive engagement.

Chuck Gillespie, CEO
National Wellness Institute, Inc.

**PRIVACY IS OUR PRIORITY**

AGS GeneShield™ is a unique and proprietary set of data security policies designed to protect our clients and their genetic information. We uphold the highest standards of bioethics and only release genetic reports to clients. Genetic data will never be sold, shared, or made available to an individual's employers. Period. No exceptions.

**IN A RECENT CORPORATE GENETIC PROGRAM SURVEY,**

Would highly recommend AGS Genetic Testing to their family and friends, and would consider paying the equivalent of $192 or more for AGS Genetic Testing.

“Agreed” or “Strongly Agreed” that AGS Genetic Testing would benefit their total health & wellness, and expressed a high level of interest in including AGS Genetic Testing as an insurance plan offering.

Agreed that adding AGS Genetic Testing to a selection of offerings would significantly increase their commitment to purchasing additional company products.

Laura Abeloe, Benefit Manager
Mesa County Valley School District 51 (CO)

We vetted many different groups & AGS exceeded our requirements for partnership: reputation, sound evidence, and privacy. Having a genetic test being part of your wellness initiative can take one-size fits all promotion campaigns and help them evolve into individual solutions that drive engagement.

Chuck Gillespie, CEO
National Wellness Institute, Inc.

**WHY INTEGRATE A GENETIC WELLNESS PROGRAM?**

The demand for safe, secure, private and affordable genetic testing is growing rapidly. In addition, several independent studies are demonstrating significant outcomes for companies who provide personalized health information and customized support.

In a 2015 study by Aetna, 2800 employees participated in a 3-gene corporate wellness program with health coaching and follow up. Results were significant:

- First year positive ROI
- 76% of participants lost an average of 10 pounds
- Sustained employee engagement of 50%
- Savings of $122/employee per month (over $600k)

**PROGRAM OVERVIEW & KEY BENEFITS**

To learn more or discuss program options, connect with the Advanced Genomic Solutions team today!

A growing number of global health and wellness professionals are choosing Advanced Genomic Solutions (AGS) as an exclusive partner for safe, secure, private genetic testing to assist their clients in achieving optimal well-being.

AGS understands that advising clients is the foundation of your professional practice. The assessment of each individual takes in as many factors as possible in order to provide a prescriptive path and achieve desired outcomes. Baseline testing, detailed history, physical assessment, and understanding both behavioral and environmental factors all play a part in the process. But is one innovative diagnostic tool missing from your arsenal that would give you greater insight and knowledge into your client or patient’s health?

**Program Highlights Include:**
- Best-in-class genetic profile reports, education & support.
- Generous wholesale discounts & retail commissions.
- Unwavering data security & client privacy.
- Free shipping & expedited results.
PROGRAM OVERVIEW & KEY BENEFITS

The AGS Practitioner & Provider Program is open to all certified Health, Wellness, Nutrition, Fitness, Athletic, and/or Medical & Clinical professionals wanting to integrate safe, secure, and private health and wellness genetic testing with clients and into their professional practices. Program enrollment is easy and affordable, and testing can begin the same day!

Key Benefits to Practitioners & Providers:

- **Personalize Client Recommendations:** Medical breakthroughs in the fields of genetics, nutrigenomics, and epigenetics have furthered our understanding of human potential and are opening new doors of opportunity for customized healthcare and wellness programs. Based on the individual DNA results of each client, you will have a significant advantage in creating unique health, nutrition, fitness and medication plans that support their health goals and wellness outcomes.

- **Develop a Growing Sense of Confidence:** Armed with an expanding number of Genetic Health & Wellness Profile reports, you can feel confident in providing specific details about each client’s unique DNA to set goals and support recommendations. This data is the cornerstone in shifting away from generic or “generalized” advice. A variety of ancillary services are also available.

- **Increase Program Engagement & Compliance:** Clients and patients are more likely to stay focused and remain committed to recommended programs if they can both understand and validate the information they receive. Seeing physical changes and positive results also helps. With your client’s personal genetic data in hand, you will have the ability to address specific factors that may be limiting their results and keeping them from achieving their desired outcomes.

- **Unparalleled Education, Training & Support:** AGS offers a variety of education and learning opportunities. These include, but are not limited to: AGS Genetic Academy™, AGS GeneED™ Training Modules, AGS Client Guides & Implementation Manuals, Marketing & Sales Resources, Webinars, Podcasts, Live Support, AGS Provider Community Group, and much more!

- **Set Yourself Apart as an Early Adopter**
- **Highly Actionable & Easy-To-Understand Reports**
- **Simple In-Office or At-Home DNA Test Collection Kits**
- **Innovative Offerings Backed by Sound Scientific Research**

**Frequently Asked Questions:**

- **How accurate are results & what is the science behind the tests?** AGS reports are validated to over 99.9% accurate and all samples are run twice to compare results. The genes and SNPs included on AGS reports are highly studied and validated with clinical relevance by our Lab Director & scientific review board.

- **Does AGS report on ancestry or disease markers?** No. AGS does not test for ancestry, paternity, forensics, or illness and disease markers. We only deliver highly actionable & easy-to-understand reports.

- **How is client DNA submitted & when are results received?** Sample collection can take place in your office or at the client’s home. After samples are received and validated, the client’s AGS Genetic Profile report is sent to the authorized practitioner or provider via encrypted email in approximately 2 to 3 weeks.

- **Why is genetic testing privacy so important?** Some laws (i.e. GINA & HIPAA) limit how genetic information can be used, but none ensures ultimate privacy since DNA cannot be “de-identified” even when separated from key identifiers.

**PROVEN RESULTS**

*Of the many genetic testing companies I have used in my professional practice, I have found AGS to have the most accurate reporting available. Their iron wall of privacy is of utmost importance to the many sports professionals and athletic organizations I work with, including owners, doctors, and players alike. WHAT IS COVID-19?
The COVID-19 virus is a respiratory illness that can be spread from person to person. It is caused by SARS CoV-2 virus (Severe Acute Respiratory Syndrome Coronavirus-2). The COVID-19 virus is a new coronavirus that was first identified after an outbreak in Wuhan, China. It has now spread throughout the world.

PCR TESTING FOR COVID-19:
This COVID-19 test is an FDA approved PCR (Polymerase Chain Reaction) test. The assay is a real-time (RT-qPCR) in vitro diagnostic test intended for the qualitative detection of RNA from SARS-CoV-2. The virus is isolated and purified from oropharyngeal (OP) and deep nasal swab specimens obtained from individuals who meet COVID-19 clinical and/or epidemiological criteria. The process is a qualitative test for the detection of the coronavirus of the SARS-CoV-2 RNA during the acute phase of infection.* PCR testing is considered the gold standard for viral detection.*

ACCURACY WITH PCR TESTING:
- Process is standardized for all microbes.
- Because a specific sequence can be amplified, much less clinical material is needed to make a diagnosis.
- Identifies causative organism SARS CoV-2 by its RNA (possible to diagnosis infections accurately).
- Reliable diagnosis (high sensitivity & specificity) >95% sensitivity and >95% specificity.**
- Reliable results are dependent on adequate specimen collection, transport, storage and processing.

TURN AROUND TIME (TAT) & SPECIMENT STABILITY
Results will be delivered to the client and their employer or provider within 24 hours of being received by lab. Specimens are stable for up to 72 hours at room temperature.
WHAT IS COVID-19 TESTING?

What we do:
- Simple and fast.
- On-site collection.

WHY SHOULD EMPLOYERS OFFER TESTING?

As businesses begin to reopen, employers will need to do everything they can to ensure the health and safety of their employees. Many people infected with the COVID-19 virus do not demonstrate symptoms, but still spread the disease. The CDC recommends testing employees prior to their return to work with PCR testing to notify and confirm employed team members, if positive, so they can quarantine and seek medical help.

WHICH TYPE OF TESTING IS RECOMMENDED?

AGS offers two types of COVID-19 testing. RT-qPCR (PCR) and Antibody (Serologic) Testing. The PCR test is highly accurate and recommended by the CDC:

- **PCR Test.** Viral tests check samples from your respiratory system (such as swabs of the inside of the nose) to tell you if you currently have an infection with SARS-CoV-2, the virus that causes COVID-19. For more information, refer to the CDC guidelines on COVID-19 testing.

- **Antibody Test.** A person’s natural immune response to COVID-19 is the production of antibodies IgG and IgM. An antibody test may not be able to show if you have a current infection, because it can take 1-3 weeks after infection to make antibodies. We do not know yet if having antibodies to the virus can protect someone from getting infected with the virus again, or how long that protection might last.

HOW MUCH IS TESTING?

Prepaid testing, $149 per test.
Includes on-site sample collection.
AGS can work with employers to organize drive up collection for participating employees. Authorized AGS Practitioners & Providers may offer in-office testing for patients.

WHY SHOULD EMPLOYERS OFFER TESTING?

As businesses begin to reopen, employers will need to do everything they can to ensure the health and safety of their employees. Many people infected with the COVID-19 virus do not demonstrate symptoms, but still spread the disease. The CDC recommends testing employees prior to their return to work with PCR testing to notify and confirm employed team members, if positive, so they can quarantine and seek medical help.

WHICH TYPE OF TESTING IS RECOMMENDED?

AGS offers two types of COVID-19 testing. RT-qPCR (PCR) and Antibody (Serologic) Testing. The PCR test is highly accurate and recommended by the CDC:

- **PCR Test.** Viral tests check samples from your respiratory system (such as swabs of the inside of the nose) to tell you if you currently have an infection with SARS-CoV-2, the virus that causes COVID-19. For more information, refer to the CDC guidelines on COVID-19 testing.

- **Antibody Test.** A person’s natural immune response to COVID-19 is the production of antibodies IgG and IgM. An antibody test may not be able to show if you have a current infection, because it can take 1-3 weeks after infection to make antibodies. We do not know yet if having antibodies to the virus can protect someone from getting infected with the virus again, or how long that protection might last.
